Opening the Digital Economy

Shaping Europe's digital future is both a priority and a challenge 2022 for the European Union, which aims to be at the forefront of innovation and competitiveness, while protecting consumers. The summit will highlight policy, business, and academia's priorities regarding the digital transition in Europe, as collaboration with international partners and public-private partnerships will undoubtedly be key in areas such as data sharing, cybersecurity, and regulation of «tech giants».

About the European Business Summits

European Business Summit is a well-known organization which creates and supports networking and debating events in Brussels, including our biggest and most prestigious event - the annual European Business Summit. Our principal goal is to bring business and politics together and stimulate thinking on the most challenging European issues. Through its events and publications, EBS delivers an inspired and informed contribution to policy-making in Europe. In addition to our flagship European Business Summit, EBS supports topical and relevant 1-day summits that are held throughout the year, including EU-Africa Business Summit, EU Digital Summit, Clean Energy Summit, European Health Summit, European Defence Industry Summit and bespoke events.
